

## **Elementary-Education**

### **Session: 2019-20**

Activities are very important tools of strengthening is important to note. Elementary school is defined as period of formal education following pre-school but before. The first years compulsory schooling are called elementary or primary school .A group of elementary school students. Licensed from stock photo objective. the definition of elementary is something simple and basics or the entry level in to something when you have are very basics knowledge of computer programming this is an example of when you have an elementary knowledge . It is important to note that are good activity is one each abcd

1. Involves participation of every child.
2. Leads to active thing on the part of the child
3. Enables the child to learn in a joyful and interesting way

### **Planning**

Planning is absolutely center to are good child centered programme the fortnightly planning is done keeping in mind

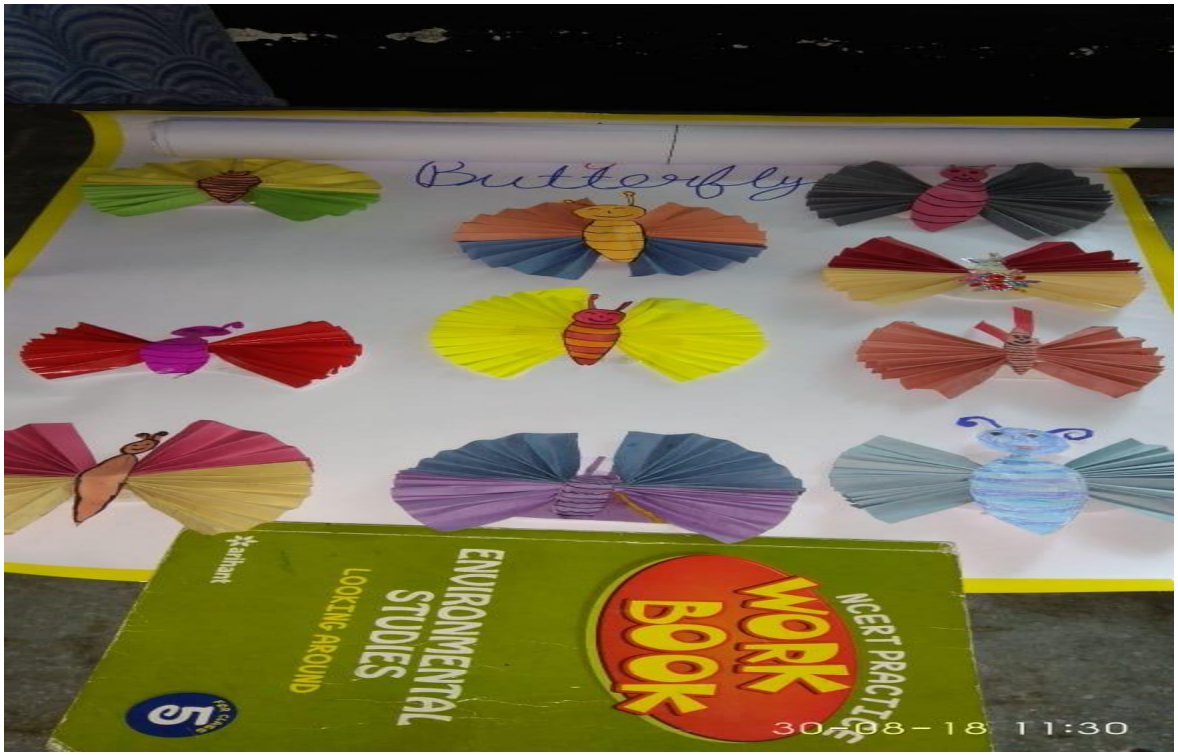

1. The specific objective of the curriculum and level wise expected learning out comes for the deferent learning areas
2. Recourses available , both financial and material.
3. Teaching learning time available

### **Teaching learning strategies**

- It gives opportunity to learn not by rote but by doing and experiencing which leads to better understanding.
- It gives opportunity to practice skills example reading and writing in joyful way
- Apart from academic growth programs related to CMP , CCA, CUB & BULBUL, celebration of various pakhwadas , days of national importance all around development students. Their activities participation and engagement in these activities make them confident, and responsible citizen of future.

**Activity-1 Based on Elementary Education Programme**

**Activity-2 Based on Elementary Education Programme**
